CONTROL PANEL

MUFFLE FURNACE

Muffle Furnace is a unique test cabinet designed to detect the percentage of ash content in a particular test specimen like rubber, elastomers. It is Bench top model and is used to evaluate the amount of inorganic compound in a test material.

- Temperature sensing through K-type sensor.
- Highly accurate test results under uniform temperatures.
- PID Control for Temperature.
- High Grade density imported Glass Wool Blanket insulation.
- Maximum Thermal Efficiency by insulation means.
- SSR based heaters.
- Auto tuning Advance PID controller

- Temperature Range : Up to **900 Degree**
- Available Size : **4"x4"x9"**
  6"x6"x12" etc.

OUR OTHER PRODUCTS :-

| Salt Spay Chamber | Hot Air Oven | Box Compression Tester | Xenon Arc Test Chamber | UV Weathering Test Chamber | Ozone Test Chamber | Melt Flow Tester |
